Multiple DAWS

Profile

Front End Developer and former writer/producer with a creative mindset and a passion for creating visually appealing and user-friendly web applications. Seeking a challenging opportunities to further develop my skills in modern front end development and contribute to innovative and interesting projects.

During the past 9 years as a signed and freelancing audio creator I've honed my creative and technical abilities through working on multiple projects for artists, labels, commercials and tv.

Work

Front End Developer at Afonso, 2026 — Present

Part time work at Stockholm based web agency Afonso where I design and develop sites for companies like Papercut, DemokratiUppropet & Elsvea.

Producer, Songwriter & Sound designer, Self Employed, 2016 — Present

Since 2016 I've worked as a freelancing music producer, songwriter, sound-designer, audio-engineer and more. Since then, I've achieved number 1 songs on radio, sold platinum selling records, done commercials and learned from the best in the industry. During most of this time I've been signed to Warner Chappell Scandinavia as a contracted producer and writer with a big focus on creating new content for artists, labels and publishers. I've also started working in new media like Unreal Engine and Wwise as a more technical sound designer.

Previous projects include:

- Produced hundreds of songs for artists and labels.
- Custom compositions for IBM commercial
- Written music for TV like "Melodifestivalen" & "Så Mycket Bättre".
- Record and implement audio for Jumpyard and all their locations.
- Record and sound design podcast.

Education

Medieinstitutet

Front End Developer YH-Program, 2024-2026

Two year Front End Development program including a 6 month internship at Stockholm based web-agency Afonso.

Musikmakarna University

Writing and Production, 2015 — 2017

Attended the acclaimed music university Musikmakarna. Gave me a tremendous start to my career as writer and producer.
